

HOW CAN WE PREPARE? (ENGLISH)

From Todd Aaron
@seeworldtruth/oceanwaveministries

- As spoken in the past, while many are distracted with pedophilia, Hollywood, end times signs, and abortion, prosperity, jobs, and success. They are failing to see the laws being passed on the local and state level. As I warned it will appear that morals and values are winning and being restored in America, as I mentioned long ago you will see abortion laws being passed as if we are winning, but because preoccupation and love of money, materialisms, religion, and ones life of distraction as people fail

to obey God's laws and pray, there is a snowball growing larger and larger underground preparing for 2024 . What will happen In the future? As i warned in the past they will eventually pass red flag gun laws while people are distracted, it's happening. ☺From there they will ban ammo and assault rifles but using federal buy back programs. If you don't comply guess what? Your neighbor or the social media atheist will say "they are a danger" because you are Jewish or Christian then next your guns are being confiscated. People will fight back, and many will die. Later they will target other guns...☺As I said before you will see vaccine exemptions revoked personal and religious. This just happened In California. Other states are In current talks.. You will see this is a prerequisite to total population control. Especially removing religious exemption. ☺As I spoken before homosexuality became legal You will see all Christian companies including churches and ministries will be forced In later days to hire LGBTQ and serve them or else it will be considered prejudice and fined and for lacking equality. You will see pastor's and churches begin accepting or simply not speaking of this agenda. ☺As warned I said celebrities will come out in Mass scale claiming Jesus and many will follow☺You will see world leaders advertising all religions into one advertising "National ___Day" and recognizing every religious holiday. ☺As spoken in the past natural disasters will continue to grow worse and worse and insurance companies rates will skyrocket In later days, you will see organizations and federal and state funds become exhausted. Once they rebuild, soon after things ☺☺☺

(incomplete post, this is all that was collected)
